

AIR TEAK IS FOREVER

By [Patrick Sciacca](#) | April 27th, 2011

Air Teak is a composite product that comes from noted yacht designer Stephen French. French is the man behind **Applied Concepts Unleashed** and has had a hand in the creating lines of a vast amount of custom Carolina boats plying the seas today. This new venture involves the design of a composite teak product that can be used for everything from faux transoms to interior tables, fighting chairs, and more. Here are a few examples of Air Teak in real-world marine applications (looks real to me).
